## **Existing System**

Google News is a news aggregator service developed by Google. It presents a continuous flow of links to articles organized from thousands of publishers and magazines. Google News is available as an app on Android, iOS, and the Web. Google released a beta version in September 2002 and the official app in January 2006. The initial idea was developed by Krishna Bharat. The service has been described as the world's largest news aggregator. In 2020, Google announced they would be spending 1 billion USD to work with publishers to create Showcases.

## **1. Usability Evaluation of Online News Websites: A User Perspective Approach**

[\(PDF\) Usability Evaluation of Online News Websites: A User Perspective Approach](#)

Authors : Qasem A. Al-Radaideh, Emad Abu-Shanab, Shaima Hamam, and Hani Abu-Salem

One of the most important and diverse segments of mass media is online news websites. To reach a wide range of audiences, numerous Jordanian newspapers have been published online since the 1990s. Al-Rai, Ad - Dustor , and AlGhad are some of the publications that offer an online edition. Ammon and Rum are two other pure online news blogs. The primary goal of this research is to evaluate online newspaper websites using two evaluation criteria: usability and web content. This goal is accomplished through the use of a questionnaire-based evaluation based on the ISO publication as standard number 9241-part 11's definition of usability and web content. The results are based on the replies of 204 people in the audience. According to the findings of the study, the usability factor is reasonably excellent for all Jordanian online publications, but the web content factor is modest.

## **2. A Study on Latest Trends in e-newspapers AND e-news Services in the Electronic Era**

[\(PDF\) A Study on Latest Trends in E-NEWSPAPERS and E-NEWS Services in the Electronic Era](#)

Author : Dr. Zaufishan Sajjad

Attempts to investigate the hidden benefits of e-news in the technological age. The study gives light on the history of e-reading as a phenomena as well as the necessity to analyze it in the context of the Indian market. The study outlines the research model and hypotheses that will be used to conduct an empirical investigation to determine newspaper readers' attitudes toward ereading devices and their services. This study gives information on readers' choices for ereading device services and shines insight on readers' attitudes about e-reading technology.

## **3. Approaches to Identify Fake News: A Systematic Literature Review**

[Approaches to Identify Fake News: A Systematic Literature Review](#)

Author : Dylan de Beer and Machdel Matthee

With the extensive diffusion of information through digital media platforms, it is critical for people and society to be able to assess its reliability. Fake news is not a new notion, but it is a prevalent occurrence in today's world. Fake news may vary from being just bothersome to influencing and deceiving populations or even governments. There are several methods for detecting bogus news. We identify the primary ways currently available to identify false news and how these approaches may be implemented in different contexts by doing a thorough literature study. Some techniques are accompanied with a relevant example, as well as the problems and environment in which the specific strategy might be employed.

#### **4. Android News APP**
